

Training Program

Virtual Instruments provides partners and customers high-quality training offerings to keep them on the cutting edge of knowledge and practice.

Training Methods

To meet the needs of different learning styles, we offer various training methods:

Virtual Instruments Classroom – Traditional in-person at a Virtual Instruments classroom.

- Train in a comfortable, conducive hands-on environment
- Face-to-face collaboration and interaction with instructors and peers

Live Online Classroom – Live instructor delivers training from our online virtual classroom.

- No travel cost incurred
- Real-time interaction with instructors and peers
- Option for dedicated (single customer) live online classroom; classes can have custom content and delivery

Dedicated Onsite Training – Dedicated, custom instruction at your facility.

- Training customized to your team
- Cost-effective group training
- Tailored delivery schedule to your team requirements

eLearning – 24/7 on-demand, self-paced training through Virtual Instruments University.

- Learn at a pace that is comfortable for you
- Access training when it is convenient for you

Training Schedule

- Calendar access in Virtual Instruments University
