

Virtual Instruments Training

Virtual Instruments University

Virtual Instruments University provides customers and partners with online and live training options designed to help them increase their knowledge and skills in using the Virtual Instruments platform to improve application availability and performance while optimizing infrastructure cost.

Learning options include training in using the Virtual Instruments products and solutions as well as domain knowledge covering industry standards and best practices for storage and virtualization.

Access to the online Learning Management System is provided at no cost to all Virtual Instruments partners.

Training Catalog

Learning Plans	Type	Description
VirtualWisdom Foundations	Online, self-paced	The VirtualWisdom Foundations learning plan provides an overview of the VirtualWisdom architecture, solution and introduces the customer to the value it provides in Infrastructure Performance Management.
Introduction to VirtualWisdom	Live, instructor-led	This live, instructor-led remote training provides instruction in navigating the VirtualWisdom5.2 solution and performing basic reporting and analysis tasks.
VirtualWisdom Product Release Updates	Online, self-paced	This learning plan provides updates on the VirtualWisdom5 product releases. Each module reviews the new features available to users in each of the VirtualWisdom5 product releases.
Load Dynamix Enterprise Foundations	Online, self-paced	This series of short (4 to 8 min) videos introduces the Load Dynamix Enterprise product and covers valuable use cases to assist the LDX Enterprise customer in understanding how the solution is used.
Load Dynamix Enterprise Advanced	Online, self-paced	This series of short videos is targeted at the advanced Load Dynamix Enterprise user and covers how LoadDynamix Enterprise is used to solve common problems related to storage validation testing.
Storage, Networking and Virtualization	Online, self-paced	This learning plan covers important technical industry topics that are helpful for the new VirtualWisdom user to understand. Topics include Fibre Channel and SAN fundamentals and physical layer cleanliness and best practices for cleaning optics.

Introduction to Traffic Access Points	Online, self-paced	Introduces TAPs: what they do and why they are used with the VirtualWisdom solution.
--	--------------------	--

Accreditation Program

Virtual Instruments University offers no-cost accreditations that provide basic knowledge and augment our certification program. Completion of one or more online, self-paced training courses is required to receive Virtual Instruments Accreditation (VIA).

Accreditation Catalog

Accreditation	Type	Description
Virtual Instruments Sales Specialist	Online, self-paced	The Sales Specialist learning plan enables new partners to effectively market Virtual Instruments solutions. Partners are awarded the VI Sales Specialist Accreditation and can download a certificate marking their accomplishment.
Virtual Instruments Product Specialist	Online, self-paced	The VirtualWisdom Product Specialist learning plan provides an overview of the Virtual Instruments products and services and prepares the partner to present the features of the Virtual Instruments platform. Partners are awarded the VI Sales Specialist Accreditation and can download a certificate marking their accomplishment.

Certification Program

The Virtual Instruments Certified Professional (VICP) program validates and ensures that Virtual Instruments partners possess the skills and knowledge required to install, configure, administer and use the Virtual Instruments platform and solutions.

For more information on accreditation and certification options, please contact training@virtualinstruments.com.

Virtual Instruments Expert Services Training

Virtual Instruments also offers tailored, online or on-site live training through our Professional Services team. Expert Services training provides instruction in advanced use of the customer's Virtual Instruments solution to perform analysis and troubleshooting based on the customer's use cases.
